

## Marge Municipal Accounting Program: A Customized Accounting Program for Wisconsin Municipal Clerks

### Benefits of Cloud Computing

on the TownHall Software  
Private Cloud Server

#### Always log into the latest version of the program!

All users have all upgrades & updates immediately.

No more checking version numbers and paying additional fees to get the latest program.

#### Runs FAST!

The program will run as fast as if it were actually running on your local computer – and in many instances, *much* faster!

DSL, 4G or Cable internet connections are recommended.

#### Backups are done and saved automatically!

Done every 10 minutes, daily, monthly.

Also has a one-button restore process.

**No extra service fees for off-site backup!**

#### Work from Anywhere!

Work from home, office, laptop, or even right at a board meeting!

Connect to Marge Accounting with our secure key file and credentials.

#### Multi-user program!

You do not need a local area network.

(Talk to us about additional user costs.)

#### Auditors and Board members can have read-access.

They can generate reports they need for audits and periodic review.

#### Data is secure and encrypted!

We own our own cloud server (we do not rent server space from other companies). Data is immune to your computer viruses and crashing.

#### All reports are can be saved to your local drive.

Generated as PDF documents so you can email, print, and archive as needed.

#### User Manual.

The manual is updated with the program!

Access the entire user manual from within the program – which will take you right to the page you need!

#### Enhanced Technical Support.

Tech Support staff can fix your issue without the delay of transferring data back and forth or sending backups through email.

#### Your license is by user – not by computer.

New Computer? No need to worry about transferring data and software license or reinstallation! Just log in!

#### Cost-Effective.

TownHall Software includes a robust accounting program that is more reasonably priced than our competitors -- even with the latest technology.
